

In the May 2012 Table of Contents (*Mayo Clin Proc.* 2012;87[5]), there was an error in the text beneath the original article, “**Relationship of Zolpidem and Cancer Risk: A Taiwanese Population-Based Cohort Study.**” The text should have read: Use of zolpidem, a non-benzodiazepine drug commonly prescribed to treat insomnia, was associated with an increased cancer risk. Considering zolpidem’s market-leading status, this could have important clinical implications.
