In The Limelight

- 1035** In the Limelight: June 2022
Karl A. Nath 

Editorials

- 1038** Making the Case to Measure and Improve Cardiorespiratory Fitness in Routine Clinical Practice
Carl J. Lavie, Ross Arena, and Leonard A. Kaminsky
- 1041** Importance of More Potent Antiplatelet Therapy in Myocardial Infarction With Cardiac Arrest or Cardiogenic Shock
Mark B. Effron
- 1044** When Will American Patients Start Benefitting From Biosimilars?
Arnold G. Vulto and Liese Barbier

Medical Image

- 1048** Vertebrobasilar Dolichoectasia Resulting in Displacement of the Cervicomedullary Junction
Carmen R. Holmes, Panagiotis Kerezoudis, and Rafid Mustafa

Perspective and Controversy

- 1050** The Chauvet Workgroup: A Resource for the Psychosocial Aspects of Reconstructive Transplantation
Martin Kumnig, Sheila G. Jowsey-Gregoire, Maggie Bellew, Wendy Dean, Stina Järholm, Kathy Coffman, Charlotte Brown, Elisa Moreno, Simon G. Talbot, Emmanuel Morelon, Palmira Petruzzo, and Hatem Amer 

Original Articles

- 1054** Objectively Assessed Cardiorespiratory Fitness and All-Cause Mortality Risk: An Updated Meta-analysis of 37 Cohort Studies Involving 2,258,029 Participants
Jari A. Laukkanen, Nzechukwu M. Isiozor, and Setor K. Kunutsor 
- These results suggest that guideline bodies should consider the inclusion of cardiorespiratory fitness in standard risk panels for mortality risk assessment.

- 1074 Newer P2Y₁₂ Inhibitors vs Clopidogrel in Acute Myocardial Infarction With Cardiac Arrest or Cardiogenic Shock: A Systematic Review and Meta-analysis**
Sri Harsha Patlolla, Harika Kandlakunta, Aravind R. Kuchkuntla, Colin P. West, M. Hassan Murad, Zhen Wang, Ajar Kochar, S. Tanveer Rab, Bernard J. Gersh, David R. Holmes Jr, David X. Zhao, and Saraschandra Vallabhajosyula  
In patients with acute myocardial infarction—cardiac arrest/cardiogenic shock receiving dual antiplatelet therapy, newer P2Y₁₂ inhibitors were associated with lower rates of early and 1-year mortality compared with clopidogrel.
- 1086 Implementing and Optimizing Biosimilar Use at Mayo Clinic**
Chelsee J. Jensen, Eric M. Tichy, Mary B. Lempke, Adam M. Ewald, Sara J. Erickson, Michelle R. Holm, and Scott A. Soefje 
Through use of a multidisciplinary team approach, tools within the EHR, and direct health care professional education and communication, Mayo Clinic successfully adopted the use of biosimilars, which resulted in considerable cost savings.
- 1094 Prevalence and Natural History of Mitral Annulus Calcification and Related Valve Dysfunction**
Nahoko Kato, Mayra Guerrero, Ratnasari Padang, Jennifer M. Amadio, Mackram F. Eleid, Christopher G. Scott, Alexander T. Lee, Sorin V. Pislaru, Vuyisile T. Nkomo, and Patricia A. Pellikka  
In a large cohort of adults undergoing echocardiography, the prevalence of mitral annulus calcification was 23%. Mitral valve dysfunction was more than twice as prevalent in patients with mitral annulus calcification.
- 1108 Socioeconomic Deprivation and Premature Cardiovascular Mortality in the United States**
Graham H. Bevan, Khurram Nasir, Sanjay Rajagopalan, and Sadeer Al-Kindi 
This study demonstrates an association between socioeconomic deprivation and premature cardiovascular mortality and shows potentially worsening disparities.
- 1114 Risk Factors for Silent Brain Infarcts and White Matter Disease in a Real-World Cohort Identified by Natural Language Processing**
Lester Y. Leung, Yichen Zhou, Sunyang Fu, Chengyi Zheng, Patrick H. Luetmer, David F. Kallmes, Hongfang Liu, Wansu Chen, and David M. Kent  
Advanced age is strongly associated with incidentally discovered silent brain infarcts and white matter disease.
- 1123 Right Ventricular Enlargement and Dysfunction Are Associated With Increased All-Cause Mortality in Hypertrophic Cardiomyopathy**
Songnan Wen, Cristina Pislaru, Steve R. Ommen, Michael J. Ackerman, Sorin V. Pislaru, and Jeffrey B. Geske  
Although perturbations in right ventricular size and function were observed in fewer than 5% of patients with hypertrophic cardiomyopathy, they were associated with nearly two-fold higher all-cause mortality at long-term follow-up.
- 1134 Shift Work, Genetic Factors, and the Risk of Heart Failure: A Prospective Study of the UK Biobank**
Cheng Xu, Zhenkun Weng, Jingjia Liang, Qian Liu, Xin Zhang, Jin Xu, Qingguo Li, Yong Zhou, and Aihua Gu 
Shift work, particularly permanent night shift work, may increase the risk of heart failure in females, especially in those with high genetic risk.
- 1145 Outcomes of Patients With Type 2 Myocardial Infarction Complicating Acute Ischemic Stroke**
Salik Nazir, Robert W. Ariss, Abdul Mannan Khan Minhas, Keerat Rai Ahuja, Hani Jneid, and George V. Moukarbel 
Type 2 myocardial infarction in patients hospitalized with acute ischemic stroke is associated with poor prognosis and higher resource utilization.

Medical Image

- 1156** Rectal Condyloma Acuminatum
Yohei Ikenoyama, Yasuhiko Hamada, Daisuke Katoh, and Hayato Nakagawa

Brief Report

- 1158** Ultra-Low-Dose Systemic Tissue Plasminogen Activator in High-Risk Submassive Pulmonary Embolism
Pramod K. Guru, Abhishek R. Giri, Devang K. Sanghavi, and Charles Ritchie 

Review

- 1164** The Evolving Clinical Practice of Chronic Cough
Sumera R. Ahmad and Vivek N. Iyer

Residents' Clinics

- 1176** 47-Year-Old Man With Dizziness and Palpitations
Ikram-UI Haq, Roberto Herrera, and Ammar M. Killu
- 1182** 69-Year-Old Man With Dysuria and Right Lower Abdominal Pain
Jana Wieland, Bryce Kalei Chang, and Wei Ding
- 1188** 28-Year-Old Man With Joint Pain
Emily B. Butts, Albert Bui, and Razvan M. Chirila

Thematic Review on Aging

- 1194** Skeletal Aging
Jad G. Sfeir, Matthew T. Drake, Sundeep Khosla, and Joshua N. Farr  

Medical Image

- 1209** Primary Follicular Lymphoma in the Small Intestine: A Rare Cause of Bowel Obstruction
Tsuyoshi Suda, Naoki Oishi, and Masako Kobayashi

Letter to the Editor

- 1211** Progression of Calcific Aortic Stenosis Detected by Artificial Intelligence Electrocardiogram
David M. Harmon, Awais Malik, and Rick Nishimura

Path to Patient Image Quiz

- 1213** Amyloid Involving the Seminal Vesicles
Sounak Gupta, Loren Herrera-Hernandez, and Lori A. Erickson

Art at Mayo Clinic

- 1215** *Suzani Cloth* Silk Embroidery on Cotton
Margaret R. Wentz

Correction

1217 Correction

Icon Key

-  This article has been given "Editor's Choice" distinction.
-  An author interview accompanies this article.
-  Supplemental material accompanies this article at www.mayoclinicproceedings.org.
-  Indicates articles focusing on health humanities and ethical decision making as applied to medicine and the health sciences.
