In The Limelight

1961 In the Limelight: November 2022
Karl A. Nath

Editorials

1964 The Imposter Syndrome in Physicians
Thomas J. Beckman

1966 Explaining Unexplained Hypoglycemia Due To Insulin Analogs
Marilyn F. Augustine, Katie King, and Y. Victoria Zhang

Medical Image

1969 Linear IgA Bullous Dermatosis in Association With Crohn Disease
Pei-Chun Weng, Yi-Teng Hung, Puo-Hsien Le, and Yu-Huei Huang

Perspectives and Controversies

1971 Restoring Meaningful Content to the Medical Record: Standardizing Measurement Could Improve EHR Utility While Decreasing Burden
Mark S. Iscoe, Robert M. McLean, and Edward R. Melnick

Commentary

1975 Failure to Launch: Why Some Generics Don’t Take
Caleb J. Scheckel, Aakash Desai, and S. Vincent Rajkumar

Original Articles

Tait D. Shanafelt, Lotte N. Dyrbye, Christine Sinsky, Mickey Trockel, Maryam S. Makowski, Michael Tutty, Hanhan Wang, Lindsey E. Cartasare, and Colin P. West

Experiences of imposter phenomenon were more prevalent among physicians than workers in other fields and were associated with increased rates of burnout, lower levels of professional fulfillment, and a higher prevalence of suicidal ideation.
1994 Pitfalls in Diagnosing Hypoglycemia Due to Exogenous Insulin: Validation and Utility of an Insulin Analog Assay
Aoife M. Egan, Kemelia D. Galior, Anthony D. Maus, Erica Fatica, Vinaya Simha, Pankaj Shah, Ravinder J. Singh, and Adrian Vella

The immunoassay reported here is appropriate for use in clinical laboratories when factitious hypoglycemia is considered as a differential diagnosis.

2005 Plant-Based Diets and All-cause and Cardiovascular Mortality in a Nationwide Cohort in Spain: The ENRICA Study
M. Delgado-Velandia, J. Marato-Rodriguez, R. Ortolá, E. García-Esquinas, F. Rodríguez-Artalejo, and M. Sotos-Prieto

Higher adherence to a healthful plant-based diet, but not to an unhealthful plant-based diet, was associated with lower all-cause and cardiovascular disease mortality.

2016 Night Shift Work, Genetic Risk, and Hypertension
Zhihao Xiao, Cheng Xu, Qian Liu, Qing Yan, Jingjia Liang, Zhenkun Weng, Xin Zhang, Jin Xu, Dong Hang, and Aihua Gu

More night shift work and higher genetic risk were associated with a higher risk of hypertension.

2028 Outcomes of Athletes With Genetic Heart Diseases and Implantable Cardioverter-Defibrillators Who Chose to Return to Play
Kathryn E. Tobert, J. Martijn Bos, Bryan C. Cannon, and Michael J. Ackerman

For athletes with genetic heart disease and an ICD, no sports-associated deaths or reports of sports-related ICD damage occurred.

2040 Association of Lifestyle Behaviors With Hearing Loss: The UK Biobank Cohort Study
Humberto Yévenes-Briones, Francisco Félix Caballero, José Ramón Banegas, Fernando Rodríguez-Artalejo, and Esther Lopez-Garcia

Adherence to a higher number of healthy lifestyle behaviors was associated with decreased risk of hearing loss.

2050 Renin Production by Juxtaglomerular Cell Tumors and Clear Cell Renal Cell Carcinoma and the Role of Angiotensin Signaling Inhibitors

These findings highlight a need for further evaluating angiotensin signaling inhibitors as a potential therapeutic agent for such patients in both metastatic and nonmetastatic settings.

2065 Peripheral Artery Disease and Subsequent Risk of Infectious Disease in Older Individuals: The ARIC Study
Yejin Mok, Junichi Ishigami, Pamela L. Lutsey, Hiroyumi Tanaka, Michelle L. Meyer, Gerardo Heiss, and Kunihiro Matsumoto

Peripheral artery disease and borderline low ankle-brachial index were robustly associated with infection-related hospitalization of older adults.

2076 Clinician Adoption of an Artificial Intelligence Algorithm to Detect Left Ventricular Systolic Dysfunction in Primary Care.

Clinicians who most frequently followed the recommendations of an artificial intelligence tool were twice as likely to diagnose low ejection fraction.

Continued
Using antipsychotics in early pregnancy did not result in a greater risk of metabolic complications for mothers and newborns.
